

Ethshaam Ul-Hussan

Digital Media Technology Graduate

BSc Graduate looking for a role in Graduate/ Junior Software Tester. I have an outstanding aptitude in analytical skills, ability to adapt to change of environment and exceptional communication and time management skills. I take a keen interest in the world of testing. I am hoping to start working as a Software Tester to give me experience and familiarity with a manual and Automation testing, supporting my career goal to become a Senior Test Manager. My dissertation project focussed on creating a bespoke app using augmented reality for people with dyslexia. I enjoy football, gaming and cooking.

Personal Projects

Augmented Reality Dyslexia App 08/2018 - present

- I collated information from various sources to understand a niche in applications available to suit the specific needs of dyslexia sufferers. I used augmented reality to understand and create a new platform to aid in revision software using clear colour patterns and font.
- Created a demo video to showcase the different functions of the application and how to use it.
- The application has allowed me to utilise my innovative side by giving me creative freedom in terms of build and functionality.
- Next steps would include liaising with different specific dyslexic charities and schools to further add more bespoke functionality to it.

Work Experience

McDonald's - Crew Member

04/2015 - present

- Strong communication skills with experience working in teams of up to 10 people to convey messages clearly, efficiently and with importance.
- Customer service and company value understanding.
- Building relationships and keeping morale high and organising team outings
- Next steps I would like to one day put this on the market, I am collating more information from schools and charities to test out my ideas

Queen Elizabeth Hospital Birmingham -

Burns Research apprentice

07/2014 - 4/2015

- Co-ordinated and managed pick-ups of blood cultures from key nurses onwards to laboratory staff for testing. I was a vital aid in maintaining this chain to ensure that tasks were completed within short periods whilst also building and maintaining important relationships.
- Provided support for nurses, adapting to a fast pace environment and constantly undertaking new tasks to which aids my learning development
